Schwelger Wall-mounted Bat Shelter 2FE

Schwelger Bird Home 1MR

Schwelger Nest Box 1B

New tree & hedge planting

To maximise the benefit to general biodiversity, native hedging species should be utilised, preferably of local provenance.

Recommended species include:

- Birch - (1.5m between plants, 2.5-3m tall)
- Crab apple - (0.3m between plants, 60cm/90cm tall)
- Blackthorn - (0.3m between plants, 60cm/90cm tall)
- Willow - (0.3m between plants, 60cm/90cm tall)
- Elder - (0.3m between plants, 60cm/90cm tall)
- Holly - (1.5m between plants, 2.5-3m tall)
- Rowan - (1.5m between plants, 2.5-3m tall)
- Beech - (0.3m between plants, 60cm/90cm tall)
- Maple - (0.3m between plants, 60cm/90cm tall)
- Cherry - (1.5m between plants, 1.5m tall)
- Oak - (1.5m between plants, 2.5-3m tall)
- Alder - (1.5m between plants, 2.5-3m tall)
- Lime - (0.9m between plants, 1.0m tall)
- Hazel - (0.9m between plants, 1.0m tall)
- Hawthorn - (0.3m between plants, 60cm/90cm tall)
- Guelder Rose - (0.3m between plants, 60cm/90cm tall)
- Dog Rose - (0.3m between plants, 60cm/90cm tall)
- Gorse - (0.3m between plants, 60cm/90cm tall)

Planting hedgerows and small woodlands can bring benefits to nature and the landscape. By growing trees, carbon dioxide is raised from the atmosphere and water is absorbed reducing the amount of water that flows off the farm land.

Plant hedge plants that are at least 45cm-60cm high which should have a strong leader shoot.

Protect newly planted hedges from livestock and machinery.

Plant new hedgerows at a density of 7 plants per metre in a staggered double row with 20cm-40cm between each row.

Do not scale this drawing. Contractors must check all dimensions from site. This drawing is copyright
