PENSIONS COMMITTEE

MEMBERSHIP (7)

Plaid Cymru (4)

Councillors

Aled Wyn Jones
Peter Read

Simon Glyn

Peredur Jenkins

Independent (2)

Councillors

John Brynmor Hughes

John Pughe Roberts

Lib / Lab (1)

Councillor

Stephen W. Churchman

Co-opted Members

Councillor David Cowans
Councillor John Griffith

Conwy Borough Council
Anglesey Council

Ex-officio Members

Chair and Vice-Chair of the Council

A G E N D A

1. APOLOGIES

To receive any apologies for absence

2. DECLARATION OF PERSONAL INTEREST

To receive any declaration of personal interest

3. URGENT ITEMS

To note any items which are urgent business in the opinion of the Chairman so that they may be considered

4. MINUTES

4 - 5

The Chairman shall propose that the minutes of the meeting of this committee held on 18.1.18 to be signed as a true record

5. TREASURY MANAGEMENT STRATEGY STATEMENT AND ANNUAL INVESTMENT STRATEGY FOR 2018/1

6 - 20

To consider the report of the Head of Finance

6. RESPONSIBLE INVESTMENT BELIEFS

21

To consider the report of the Head of Finance

PENSIONS COMMITTEE 18.01.2018

Present: Councillors: Stephen Churchman (Chair), David Cowans (Conwy Borough Council), John Griffith (Isle of Anglesey County Council), Peredur Jenkins, John Brynmor Hughes, Aled Wyn Jones, Peter Read, John Pughe Roberts and Tony Deakin (Pension Board Chair - Observing)

Officers:- Dafydd Edwards (Head of Finance Department), Caroline Roberts (Investment Manager) and Lowri Haf Evans (Member Support Officer)

1. APOLOGIES

Apologies were received from Councillor Simon Glyn

2. DECLARATION OF PERSONAL INTEREST

None to note

3. URGENT ITEMS

None to note

4. MINUTES

The Chairman signed the minutes of the previous meeting of this committee that took place on 9 November 2017, as a true record subject to noting that Councillor John Brynmor Hughes was present.

5. RESPONSIBLE INVESTMENT

The Head of Finance Department reported that Members of the Pensions Committee and members of the Pensions Board had attended a Responsible Investment training session by Paul Potter and Simon Jones from Hymans Robertson.

It was noted that it would be possible to respond practically to short term matters by discussing the steps they were acting upon when considering 'operational ownership' with the Investment Managers at the Investment Panel meeting on 28 February 2018.

In the context of the Wales Pensions Partnership, the Operator will need to report on their intention to be accountable to responsible investments as the partnership develops.

In response to the observation, members highlighted that better preparation was required prior to attending the Investment Panel meetings in order to have an opportunity to consider the information that was shared in advance. It was suggested that an informal meeting of approximately 1 hour should be held, with no representative from any company present, to discuss the information and have an opportunity to draw-up questions. It was agreed that this was an appropriate arrangement.

A proposal was made for the Head of Finance Department to request information from the Investment Managers in advance, and to arrange informal meetings prior to the meeting of the Panel. Arrangement to be trialled for 28 February 2018.

It was added that there was an intention to invite the Blackrock company to an imminent meeting of the Panel in order to explain the different options from the passive investments

they offered, including the new "MSCI Low Carbon" fund. It was accepted that this was an opportunity to receive additional information which would widen the horizon of Committee members.

The Head of Finance Department reiterated that Paul Potter from Hymans had offered to prepare a report, to be discussed at the Investment Panel, that would outline the agreed investment principles of members and Gwynedd officers based on responses to the questionnaire on the training session. The intention was for the Panel to recommend observations from the report to the next Committee meeting.

RESOLVED:

To trial holding informal preparatory meetings prior to the Investment Panel meetings.

To invite the Blackrock company to an imminent meeting of the Investment Panel. To make a request for Hymans to provide a report on Gwynedd investment principles.

6. WALES PENSIONS PARTNERSHIP

The Head of Finance Department gave an oral update on Wales Pensions Partnership developments. Following a press release, it was confirmed that Link Asset Services had been appointed as operator for the partnership's fund following a thorough procurement process by the Wales Pension Partnership and the consultants, Hymans Robertson and Burges Salmon.

It was reported that Link would jointly establish and maintain an investment vehicle which would be tax-efficient on behalf of the Wales Pension Partnership. It was added that Link, with the assistance of Russell Investments (in an investment consultant role), and in consultation with the eight single local authority funds, had started to plan the process of appointing investment managers companies.

It was highlighted that appointing Link was a positive step and a milestone on the journey of establishing a Collective Investment Vehicle, in accordance with the requirements of the Westminster Government. It was reported that the process had now entered an establishment period and that a project plan had been programmed.

The intention was that Link, with the support of the Wales Pensions Partnership, would initially establish **one** Global Equity sub-fund, in order to show that they were 'operational' on time, and then undertake detailed work on structures prior to launching other sub-funds. It would be possible to trial one sub-fund in order to have an opportunity to adapt and review the amount to invest in it as appropriate. Link would submit a document to the Governance Joint Committee in March, which would detail all of the other sub-funds and their timelines.

RESOLVED to accept the information.

The meeting commenced at 2:00pm and concluded at 2:30pm

Agenda Item 5

MEETING:	PENSIONS COMMITTEE
DATE:	15 MARCH 2018
TITLE:	TREASURY MANAGEMENT STRATEGY STATEMENT AND ANNUAL INVESTMENT STRATEGY FOR 2018/19
PURPOSE:	To ask the pensions committee to adopt the strategies
RECOMMENDATION:	RECEIVE THE REPORT FOR INFORMATION
AUTHOR:	DAFYDD L EDWARDS, HEAD OF FINANCE

1. THE PENSION FUND'S INVESTMENT STRATEGY

In accordance with the Welsh Assembly Government's Statutory Guidance on Local Government Investments, which requires an authority to produce an Annual Investment Strategy, it is considered best practice for the Gwynedd Pension Fund (the "Fund") to adopt Gwynedd Council's Treasury Management Strategy Statement (TMSS) for 2018/19, as amended for the purpose of the Pension Fund (which is attached as Appendix A). Gwynedd Council's TMSS for 2018/19 was approved by the Full Council on 1 March 2018.

2. CIPFA GUIDANCE

The Fund will also have regard to the 2009 revised CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes.

3. THE PENSION FUND'S CASHFLOW

The Fund has net inflows from its dealings with its members, so in any month, the income from contributions and transfers-in significantly exceed the pensions, transfers out and costs paid out. Once there is sufficient surplus cash it is transferred to one or more of the Fund's investment managers. Normally up to around £5 million is held back for cashflow purposes, in particular in respect of pension payments and funding calls from the private equity funds. However in the past, due to known commitments, there have been times when the surplus cash held in the Fund's bank accounts with Gwynedd Council has been over £20 million.

4. POOLING IN ORDER TO MAXIMISE RETURNS

Currently all the Fund's surplus cash is pooled with the cash balances of Gwynedd Council and invested with counterparties in accordance with Gwynedd Council's Treasury Management Strategy Statement. At the end of the financial year, Gwynedd Council pays interest over to the Pension Fund based on the Fund's daily balances over the year. This can continue if the Pensions Committee requests that the pension fund's surplus cash balances

are pooled with the Council's cash balances. It is apparent that by pooling the fund can take advantage of economies of scale, and as a result can attract better interest rates, reduce bank costs and avoid the duplication of work within the Council. The report approved by the Full Council on 1st March 2018 included agreement to continue the pooling arrangement with the Pension Fund following any request from Pensions Committee.

5. COUNTERPARTIES

The Council Treasury Management Policy Statement and practice papers include a risk matrix which will be used to define the instruments and counterparties to be used for investment purposes rather than a defined list each year.

6. SCOPE

The proposed strategy will not deal with the cash held by the Fund's investment Managers for settlements.

7. RECOMMENDATIONS

- 7.1 The Pensions Committee is asked to approve the attached Treasury Management Strategy Statement and the Annual Investment Strategy for 2018/19, as amended for the Gwynedd Pension Fund (Appendix A).
- 7.2 The Pensions Committee is also asked to make a request to the Council (even though it is not a separate body) to allow the Pension Fund's surplus cash balances to be pooled with the Council's general cashflow from 1 April 2018 onwards.

Treasury Management Strategy Statement 2018/19

1. Introduction

- 1.1 In March 2011 the Authority adopted the Chartered Institute of Public Finance and Accountancy's *Treasury Management in the Public Services: Code of Practice 2011 Edition* (the CIPFA Code) which requires the Authority to approve a treasury management strategy before the start of each financial year.
- 1.2 In addition, the Welsh Government (WG) issued revised *Guidance on Local Authority Investments* in April 2010 that requires the Authority to approve an investment strategy before the start of each financial year.
- 1.3 This report fulfils the Authority's legal obligation under the *Local Government Act 2003* to have regard to both the CIPFA Code and the WG Guidance.
- 1.4 The Authority has borrowed and invested substantial sums of money and is therefore exposed to financial risks including the loss of invested funds and the revenue effect of changing interest rates. The successful identification, monitoring and control of risk are therefore central to the Authority's treasury management strategy.
- 1.5 In accordance with the WG Guidance, the Authority will be asked to approve a revised Treasury Management Strategy Statement should the assumptions on which this report is based change significantly. Such circumstances would include, for example, a large unexpected change in interest rates, or in the Authority's capital programme or in the level of its investment balance.

2. External Context

2.1 Economic background

The major external influence on the Authority's treasury management strategy for 2018/19 will be the UK's progress in negotiating its exit from the European Union and agreeing future trading arrangements. The domestic economy has remained relatively robust since the surprise outcome of the 2016 referendum, but there are indications that uncertainty over the future is now weighing on growth. Transitional arrangements may prevent a cliff-edge, but will also extend the period of uncertainty for several years. Economic growth is therefore forecast to remain sluggish throughout 2018/19.

Consumer price inflation reached 3.0% in September 2017 as the post-referendum devaluation of sterling continued to feed through to imports. Unemployment continued to fall and the Bank of England's Monetary Policy Committee judged that the extent of spare capacity in the economy seemed limited and the pace at which the economy can grow without generating inflationary pressure had fallen over recent years. With its inflation-control

mandate in mind, the Bank of England's Monetary Policy Committee raised official interest rates to 0.5% in November 2017.

In contrast, the US economy is performing well and the Federal Reserve is raising interest rates in regular steps to remove some of the emergency monetary stimulus it has provided for the past decade. The European Central Bank is yet to raise rates, but has started to taper its quantitative easing programme, signalling some confidence in the Eurozone economy.

2.2 **Credit outlook**

High profile bank failures in Italy and Portugal have reinforced concerns over the health of the European banking sector. Sluggish economies and fines for pre-crisis behaviour continue to weigh on bank profits, and any future economic slowdown will exacerbate concerns in this regard.

Bail-in legislation, which ensures that large investors including local authorities will rescue failing banks instead of taxpayers in the future, has now been fully implemented in the European Union, Switzerland and USA, while Australia and Canada are progressing with their own plans. In addition, the largest UK banks will ringfence their retail banking functions into separate legal entities during 2018. There remains some uncertainty over how these changes will impact upon the credit strength of the residual legal entities.

The credit risk associated with making unsecured bank deposits has therefore increased relative to the risk of other investment options available to the Authority; returns from cash deposits however remain very low.

2.3 **Interest rate forecast**

The Authority's treasury adviser Arlingclose's central case is for UK Bank Rate to remain at 0.50% during 2018/19, following the rise from the historic low of 0.25%. The Monetary Policy Committee re-emphasised that any prospective increases in Bank Rate would be expected to be at a gradual pace and to a limited extent.

Future expectations for higher short term interest rates are subdued and on-going decisions remain data dependant and negotiations on exiting the EU cast a shadow over monetary policy decisions. The risks to Arlingclose's forecast are broadly balanced on both sides. The Arlingclose central case is for gilt yields to remain broadly stable across the medium term. Upward movement will be limited, although the UK government's seemingly deteriorating fiscal stance is an upside risk.

2.4 A more detailed economic and interest rate forecast provided by Arlingclose is attached at ***Appendix 1***.

2.5 For the purpose of setting the budget, it has been assumed that new investments will be made at an average rate of 0.25%, and that no new long-term loans will be required.

3. Local Context (Net Borrowing Position) – Not applicable to the Pension Fund

4. Borrowing Strategy – Not applicable to the Pension Fund

5. Investment Strategy

5.1 The Authority holds invested funds, representing income received in advance of expenditure plus balances and reserves held. In the past 12 months, the Authority's investment balance has ranged between £29 and £68 million, and similar levels are expected to be maintained in the forthcoming year.

This includes the cash balances of Gwynedd Pension Fund which are pooled with the Council's funds for investment purposes. The Pension Fund requests this annually as the returns received are improved and the risks reduced by combining the cash with the Council's funds. The Pensions Committee will approve the relevant elements of this Strategy Statement and request the continuation of the pooling arrangements for 2018/19 at its meeting on 15 March 2018.

5.2 Objectives

Both the CIPFA Code and the WG Guidance require the Authority to invest its funds prudently, and to have regard to the security and liquidity of its investments before seeking the highest rate of return, or yield. The Authority's objective when investing money is to strike an appropriate balance between risk and return, minimising the risk of incurring losses from defaults and the risk of receiving unsuitably low investment income. Where balances are expected to be invested for more than one year, the Authority will aim to achieve a total return that is equal or higher than the prevailing rate of inflation, in order to maintain the spending power of the sum invested.

5.3 Negative Interest Rates

If the UK enters into a recession in 2018/19, there is a small chance that the Bank of England could set its Bank Rate at or below zero, which is likely to feed through to negative interest rates on all low risk, short-term investment options. This situation already exists in many other European countries. In this event, security will be measured as receiving the contractually agreed amount at maturity, even though this may be less than the amount originally invested.

5.4 Strategy

Given the increasing risk and very low returns from short-term unsecured bank investments, the Authority aims to further diversify into more secure and/or higher yielding asset classes during 2018/19. The majority of the Authority's surplus cash is currently invested in short-term unsecured bank deposits, certificates of deposit and money market funds. This diversification will represent a continuation of the strategy adopted in 2015/16.

5.5 Approved Counterparties

The Authority may invest its surplus funds with any of the counterparty types in table 2 below, subject to the cash limits (per counterparty) and time limits shown.

Table 2: Approved Investment Counterparties

Credit Rating	Banks Unsecured	Banks Secured	Government	Corporates	Registered Providers
UK Govt	n/a	n/a	£ Unlimited 50 years	n/a	n/a
AAA	5% 5 years	10% 20 years	10% 50 years	5% 20 years	5% 20 years
AA+	5% 5 years	10% 10 years	10% 25 years	5% 10 years	5% 10 years
AA	5% 4 years	10% 5 years	10% 15 years	5% 5 years	5% 10 years
AA-	5% 3 years	10% 4 years	10% 10 years	5% 4 years	5% 10 years
A+	5% 2 years	10% 3 years	5% 5 years	5% 3 years	5% 5 years
A	5% 13 months	10% 2 years	5% 5 years	5% 2 years	5% 5 years
A-	5% 6 months	10% 13 months	5% 5 years	5% 13 months	5% 5 years
None	£1m 6 months	n/a	10% 25 years	£50,000 5 years	5% 5 years
Pooled funds	10% per fund				

This table must be read in conjunction with the notes below.

5.6 Credit Rating

Investment limits are set by reference to the lowest published long-term credit rating from Fitch, Moody's or Standard & Poor's. Where available, the credit rating relevant to the specific investment or class of investment is used, otherwise the counterparty credit rating is used. However, investment decisions are never made solely based on credit ratings, and all other relevant factors including external advice will be taken into account.

5.7 **Banks Unsecured**

Accounts, deposits, certificates of deposit and senior unsecured bonds with banks and building societies, other than multilateral development banks. These investments are subject to the risk of credit loss via a bail-in should the regulator determine that the bank is failing or likely to fail.

5.8 **Banks Secured**

Covered bonds, reverse repurchase agreements and other collateralised arrangements with banks and building societies. These investments are secured on the bank's assets, which limits the potential losses in the unlikely event of insolvency, and means that they are exempt from bail-in. Where there is no investment specific credit rating, but the collateral upon which the investment is secured has a credit rating, the higher of the collateral credit rating and the counterparty credit rating will be used to determine cash and time limits. The combined secured and unsecured investments in any one bank will not exceed the cash limit for secured investments.

5.9 **Government**

Loans, bonds and bills issued or guaranteed by national governments, regional and local authorities and multilateral development banks. These investments are not subject to bail-in, and there is an insignificant risk of insolvency. Investments with the UK Central Government may be made in unlimited amounts for up to 50 years.

5.10 **Corporates**

Loans, bonds and commercial paper issued by companies other than banks and registered providers. These investments are not subject to bail-in, but are exposed to the risk of the company going insolvent. Loans to unrated companies will only be made as part of a diversified pool in order to spread the risk widely.

5.11 **Registered Providers**

Loans and bonds issued by, guaranteed by or secured on the assets of Registered Providers of Social Housing, formerly known as Housing Associations. These bodies are tightly regulated by the Homes and Communities Agency and, as providers of public services, they retain the likelihood of receiving government support if needed.

5.12 Pooled Funds

Shares in diversified investment vehicles consisting of any of the above investment types, plus equity shares and property. These funds have the advantage of providing wide diversification of investment risks, coupled with the services of a professional fund manager in return for a fee. Short-term Money Market Funds that offer same-day liquidity and very low or no volatility will be used as an alternative to instant access bank accounts, while pooled funds whose value changes with market prices and/or have a notice period will be used for longer investment periods.

Bond, equity and property funds offer enhanced returns over the longer term, but are more volatile in the short term. These allow the Authority to diversify into asset classes other than cash without the need to own and manage the underlying investments. Because these funds have no defined maturity date, but are available for withdrawal after a notice period, their performance and continued suitability in meeting the Authority's investment objectives will be monitored regularly.

5.13 Operational bank accounts

The Authority may incur operational exposures, for example through current accounts, collection accounts and merchant acquiring services, to any UK bank with credit ratings no lower than BBB- and with assets greater than £25 billion. These are not classed as investments, but are still subject to the risk of a bank bail-in, and balances will therefore be kept below £900,000 per bank. The Bank of England has stated that in the event of failure, banks with assets greater than £25 billion are more likely to be bailed-in than made insolvent, increasing the chance of the Authority maintaining operational continuity.

5.14 Risk Assessment and Credit Ratings

Credit ratings are obtained and monitored by the Authority's treasury advisers, who will notify changes in ratings as they occur. Where an entity has its credit rating downgraded so that it fails to meet the approved investment criteria then:

- no new investments will be made,
- any existing investments that can be recalled or sold at no cost will be, and
- full consideration will be given to the recall or sale of all other existing investments with the affected counterparty.

Where a credit rating agency announces that a credit rating is on review for possible downgrade (also known as "rating watch negative" or "credit watch negative") so that it may fall below the approved rating criteria, then only investments that can be withdrawn on the next working day will be made with that organisation until the outcome of the review is announced. This policy will not apply to negative outlooks, which indicate a long-term direction of travel rather than an imminent change of rating.

5.15 Other Information on the Security of Investments

The Authority understands that credit ratings are good, but not perfect, predictors of investment default. Full regard will therefore be given to other available information on the credit quality of the organisations in which it invests, including credit default swap prices, financial statements, information on potential government support and reports in the quality financial press. No investments will be made with an organisation if there are substantive doubts about its credit quality, even though it may meet the credit rating criteria.

When deteriorating financial market conditions affect the creditworthiness of all organisations, as happened in 2008 and 2011, this is not generally reflected in credit ratings, but can be seen in other market measures. In these circumstances, the Authority will restrict its investments to those organisations of higher credit quality and reduce the maximum duration of its investments to maintain the required level of security. The extent of these restrictions will be in line with prevailing financial market conditions. If these restrictions mean that insufficient commercial organisations of high credit quality are available to invest the Authority's cash balances, then the surplus will be deposited with the UK Government, via the Debt Management Office or invested in government treasury bills for example, or with other local authorities. This will cause a reduction in the level of investment income earned, but will protect the principal sum invested.

5.16 Specified Investments

The WG Guidance defines specified investments as those:

- denominated in pound sterling,
- due to be repaid within 12 months of arrangement,
- not defined as capital expenditure by legislation, and
- invested with one of:
 - the UK Government,
 - a UK local authority, parish council or community council, or
 - a body or investment scheme of "high credit quality".

The Authority defines "high credit quality" organisations as those having a credit rating of A- or higher that are domiciled in the UK or a foreign country with a sovereign rating of AA+ or higher. For money market funds and other pooled funds "high credit quality" is defined as those having a credit rating of A- or higher.

5.17 Non-specified Investments

Any investment not meeting the definition of a specified investment is classed as non-specified. The Authority does not intend to make any investments denominated in foreign currencies. Non-specified investments will therefore be limited to long-term investments, i.e. those that are due to mature 12 months or longer from the date of arrangement; those that are defined as capital expenditure by legislation, such as shares in money market funds and

other pooled funds; and investments with bodies and schemes not meeting the definition on high credit quality. Limits on non-specified investments are shown in table 3 below.

Table 3: Non-Specified Investment Limits

	Cash limit
Total long-term investments	£30m
Total shares in Money Market funds	£30m
Total shares in other pooled funds	£6m
Total investments without credit ratings or rated below A- (except the UK Government and UK Local Authorities)	£6m
Total investments (except pooled funds) with institutions domiciled in foreign countries rated below AA+	£6m
Total non-specified investments	£60m

5.18 Investment Limits

The Authority's revenue reserves and Pension Fund cash available to cover investment losses are forecast to be £45 million on 31st March 2018. In order that no more than 15% of available reserves will be put at risk in the case of a single default, the maximum that will be lent to any one organisation (other than the UK Government) will be £6 million. A group of banks under the same ownership will be treated as a single organisation for limit purposes. Limits will also be placed on fund managers, investments in brokers' nominee accounts, foreign countries and industry sectors as below. Investments in pooled funds and multilateral development banks do not count against the limit for any single foreign country, since the risk is diversified over many countries.

Table 4: Investment Limits

	Cash limit
Any single organisation, except the UK Central Government	£6m each
UK Central Government	unlimited
Any group of organisations under the same ownership	£6m per group
Any group of pooled funds under the same management	£15m per manager
Negotiable instruments held in a broker's nominee account	£30m per broker
Foreign countries	£6m per country
Registered Providers	£15m in total
Unsecured investments with Building Societies	£6m in total
Loans to unrated corporates	£6m in total
Money Market Funds	£ £30m in total

5.19 Liquidity management

The Authority uses prudent cash flow forecasting techniques to determine the maximum period for which funds may be committed.

5.20 Non-Treasury Investments

Although not classed as treasury management activities and therefore not covered by the CIPFA Code or the WG Guidance, the Authority may also purchase property for investment purposes and may also make loans and investments for service purposes, for example in shared ownership housing, or as loans to local businesses and landlords,.

Such loans and investments will be subject to the Authority's normal approval processes for revenue and capital expenditure and need not comply with this treasury management strategy.

The Authority's existing non-treasury investments are listed in Appendix B.

6. Treasury Management Indicators – Not applicable to the Pension Fund

7. Other Items

7.1 There are a number of additional items that the Authority is obliged by CIPFA or WG to include in its Treasury Management Strategy.

7.2 Policy on Use of Financial Derivatives

In the absence of any explicit legal power to do so, the Authority will not use standalone financial derivatives (such as swaps, forwards, futures and options). Derivatives embedded into loans and investments, including pooled funds and forward starting transactions, may be used, and the risks that they present will be managed in line with the overall treasury risk management strategy.

7.3 Investment Training

The needs of the Authority's treasury management staff for training in investment management are assessed every year as part of the staff appraisal process, and additionally when the responsibilities of individual members of staff change.

Staff regularly attend training courses, seminars and conferences provided by Arlingclose and CIPFA. Relevant staff are also encouraged to study professional qualifications from CIPFA and other appropriate organisations.

7.4 Investment Advisers

The Authority has appointed Arlingclose Limited as treasury management advisers and receives specific advice on investment, debt and capital finance issues. The quality of this service is monitored by the Head of Finance and the Investment Manager on a regular basis.

7.5 Investment of Money Borrowed in Advance of Need

The Authority may, from time to time, borrow in advance of need, where this is expected to provide the best long term value for money. Since amounts borrowed will be invested until spent, the Authority is aware that it will be exposed to the risk of loss of the borrowed sums, and the risk that investment and borrowing interest rates may change in the intervening period. These risks will be managed as part of the Authority's overall management of its treasury risks.

The total amount borrowed will not exceed the authorised borrowing limit of £195 million. The maximum period between borrowing and expenditure is expected to be two years, although the Authority is not required to link particular loans with particular items of expenditure.

8. Financial Implications

The budget for investment income in 2018/19 is £0.09 million, based on an average investment portfolio of £25.7 million at an interest rate of 0.25%. The budget for debt interest payable in 2018/19 is £6.0 million, based on an average debt portfolio of £106.6 million at an average interest rate of 5.62%. If actual levels of investments and borrowing, and actual interest rates differ from those forecast, performance against budget will be correspondingly different.

9. Other Options Considered

The WG Guidance and the CIPFA Code do not prescribe any particular treasury management strategy for local authorities to adopt. The Head of Finance, having consulted the Cabinet Member for Resources, believes that the above strategy represents an appropriate balance between risk management and cost effectiveness. Some alternative strategies, with their financial and risk management implications, are listed below.

Alternative	Impact on income and expenditure	Impact on risk management
Invest in a narrower range of counterparties and/or for shorter times	Interest income will be lower	Lower chance of losses from credit related defaults, but any such losses will be greater
Invest in a wider range of counterparties and/or for longer times	Interest income will be higher	Increased risk of losses from credit related defaults, but any such losses will be smaller
Borrow additional sums at long-term fixed interest rates	Debt interest costs will rise; this is unlikely to be offset by higher investment income	Higher investment balance leading to a higher impact in the event of a default; however long-term interest costs will be more certain
Borrow short-term or variable loans instead of long-term fixed rates	Debt interest costs will initially be lower	Increases in debt interest costs will be broadly offset by rising investment income in the medium term, but long term costs will be less certain
Reduce level of borrowing	Saving on debt interest is likely to exceed lost investment income High premia for early redemption of debt may outweigh any savings	Reduced investment balance leading to a lower impact in the event of a default; however long-term interest costs will be less certain

Arlingclose Economic & Interest Rate Forecast November 2017

- In a 7-2 vote, the MPC increased Bank Rate in line with market expectations to 0.5%. Dovish accompanying rhetoric prompted investors to lower the expected future path for interest rates. The minutes re-emphasised that any prospective increases in Bank Rate would be expected to be at a gradual pace and to a limited extent.
- Further potential movement in Bank Rate is reliant on economic data and the likely outcome of the EU negotiations. Policymakers have downwardly assessed the supply capacity of the UK economy, suggesting inflationary growth is more likely. However, the MPC will be wary of raising rates much further amid low business and household confidence.
- The UK economy faces a challenging outlook as the minority government continues to negotiate the country's exit from the European Union. While recent economic data has improved, it has done so from a low base: UK Q3 2017 GDP growth was 0.4%, after a 0.3% expansion in Q2.
- Household consumption growth, the driver of recent UK GDP growth, has softened following a contraction in real wages, despite both saving rates and consumer credit volumes indicating that some households continue to spend in the absence of wage growth. Policymakers have expressed concern about the continued expansion of consumer credit; any action taken will further dampen household spending.
- Some data has held up better than expected, with unemployment continuing to decline and house prices remaining relatively resilient. However, both of these factors can also be seen in a negative light, displaying the structural lack of investment in the UK economy post financial crisis. Weaker long term growth may prompt deterioration in the UK's fiscal position.
- The depreciation in sterling may assist the economy to rebalance away from spending. Export volumes will increase, helped by a stronger Eurozone economic expansion.
- Near-term global growth prospects have continued to improve and broaden, and expectations of inflation are subdued. Central banks are moving to reduce the level of monetary stimulus.
- Geo-political risks remains elevated and helps to anchor safe-haven flows into the UK government bond (gilt) market.

Forecast:

- The MPC has increased Bank Rate, largely to meet expectations they themselves created. Future expectations for higher short term interest rates are subdued. On-going decisions remain data dependant and negotiations on exiting the EU cast a shadow over monetary policy decisions.
- Our central case for Bank Rate is 0.5% over the medium term. The risks to the forecast are broadly balanced on both sides.
- The Arlingclose central case is for gilt yields to remain broadly stable across the medium term. Upward movement will be limited, although the UK government's seemingly deteriorating fiscal stance is an upside risk.

MEETING: **PENSIONS COMMITTEE**

DATE: **15 MARCH 2018**

TITLE: **RESPONSIBLE INVESTMENT AND GOVERNANCE**

PURPOSE: **To ask the Pensions Committee to adopt fundamental principles regarding responsible investment**

AUTHOR: **DAFYDD L EDWARDS, HEAD OF FINANCE**

1. Introduction

A paper on Agreeing Responsible Investment Beliefs was discussed at the Investment Panel on 28 February. That paper included the principles listed in 2.1 and 2.3 - 2.5 below. Following consideration, the Panel added the principle suggested in 2.2 below.

2. Responsible Investment Beliefs

- 2.1** In line with the Committee's fiduciary duty, financial considerations should carry more weight than non-financial considerations within investment decision making, although environmental, social and governance (ESG) factors can have a material impact on risk and return. The consideration of ESG factors should therefore be embedded in the investment processes and decision making of managers employed by the Fund.
- 2.2** The Fund's Committee will look to invest in sustainable assets, including investing within the Welsh region where non-financial benefits may accrue, provided that fiduciary duty conditions are met.
- 2.3** The Committee recognise they have a duty to be a responsible investor. Engagement with companies, rather than disinvestment, is expected to be more effective in changing corporate behaviours and reducing risk. Collaborative action, where possible, offers the most successful means of engagement to influence outcomes.
- 2.4** As a long-term investor, the Fund is exposed to systemic risks such as climate change and the expected transition to a low-carbon economy. Financial outcomes could be improved by effectively managing the Fund's exposure to such risks.
- 2.5** Disclosure across all stages of the value chain can improve the understanding of stakeholders and improve outcomes.

3. Recommendation

The Committee is asked to approve responsible investment principles listed in 2.1 - 2.5 above, to be included in the Fund's Investment Strategy Statement.
