

<b>MEETING</b>	<b>Joint Local Development Plan Committee</b>
<b>DATE</b>	<b>30 September 2019</b>
<b>NAME</b>	Joint Local Development Plan Annual Monitoring Report August 2017 – March 2019
<b>PURPOSE</b>	Present the First JLDP Annual Monitoring Report 2019
<b>RECOMMENDATION</b>	The Joint Planning Policy Committee is asked to accept the Annual Monitoring Report (Appendix 1) and offer advice on it before it is presented to the Cabinet (Gwynedd Council) and the Executive (Ynys Môn)
<b>AUTHOR</b>	Joint Planning Policy Unit Manager,

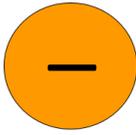

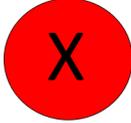

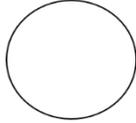

## 1 Background

- 1.1 As members are aware, the Local Development Plan (LDP) is required to be monitored annually and the report must be submitted to the Welsh Government by 31st October 2019. The Unit has previously presented a report which provided an overview of the monitoring process in July, including the legislative requirements. The purpose of this report is to present the first Annual Monitoring Report, which reports of the period since adoption, 1<sup>st</sup> August 2017 – 31 March 2019.

## 2 The Monitoring Framework (Chapter 7 in the Plan)

- 2.1 The Gwynedd and Môn joint Local Development plan was adopted at the end of July 2017. Therefore, in order to have a complete financial year, this is the first year in which it is possible to submit an AMR to the Welsh Government.
- 2.2 The AMR provides an important evidence base for the review of the Joint LDP and over time AMR can show trends, identify any policies that are delivering or not, and highlight if there is any policy void or omission. The Gwynedd and Anglesey LDP has a monitoring framework which was agreed with the Inspector during the Examination. The Monitoring Framework can be found in Chapter 7 of the Joint LDP. There are 69 indicators, which report on the 5 themes in the JLDP.
- i. As a visual aid when monitoring the effectiveness of policies and to provide an overview of performance, key indicators and outcomes are shown in the table below.

Symbol	Description	Number of Indicators
	Local policy contributes to achieving Plan objectives and performs in accordance with, or better than, expectations.	35

	The policy target is currently not achieved as anticipated but this is not leading to concerns regarding policy implementation.	32
	Local policy does not provide expected results and there are resulting concerns regarding Policy implementation.	1
	There is no conclusion - available data is scarce.	1

- 2.3 It is a statutory requirement to include the two following indicators in the Monitoring Framework:
- i. Land Supply for Housing from the Annual Housing Land Availability Study;
  - ii. Additional net number of affordable and market units constructed in the Plan area.
- 2.4 There is also an expectation that every monitoring framework includes indicators related to the following:
- i. the spatial distribution of housing development;
  - ii. number of housing constructed compared to the demand for housing;
  - iii. number of affordable housing constructed compared to the target in the Plan;
  - iv. the type of affordable housing constructed (tenure);
  - v. market viability;
  - vi. development rate on allocations;
  - vii. developing key infrastructure projects;
  - viii. Gypsy and Travellers accommodation sites that are developed.
- 2.5 Other indicators seen in the Monitoring Framework of the Joint Local Development Plan are specific to the area of the JLDP e.g. indicators for Wylfa Newydd.
- 2.6 If trigger points are reached, the matter will need to be investigated in order to understand why policies and proposals are not being implemented as proposed and to determine what action is required. Councils will need to consider how all related indicators work and the interrelation between them and the extent of the underperformance. Some indicators are more significant than others in terms of delivering the strategy of the Local Development Plan. Underperformance in itself does not involve the need to review and amend the Plan. In accordance with Welsh Government guidance, the Monitoring Framework clearly notes what the options are for action in cases of underperformance.
- 2.7 The table below provides the actions available in the Monitoring Framework. Other actions could be relevant, depending on the circumstances, e.g. amending adopted supplementary planning guidance. An action has been identified against each

indicator in the AMR as part of the analysis. A few indicators have a grey colour as the indicator has been achieved e.g. adoption of SPG. The table below outlines a summary of the actions following the assessment of the Monitoring Framework indicators.

Assessment	Action	Number of indicators in the category.
Where indicators suggest that LDP policies are effectively implemented	No further action needed with the exception of continuing to monitor	64
Assessment of decisions on planning applications suggests that policies are not being implemented as intended	Perhaps an Officer and / or Member needs to be trained	1
Assessment suggests that additional further guidance is needed for those identified in the Plan in order i) to explain how policy should be implemented correctly, or ii) to facilitate the development of specific sites.	Publish an additional Supplementary Planning Guidance, that could include the development briefs of specific sites, work closely with the private sector and infrastructure providers, where relevant.	
Assessment suggests that policy is not as effective as expected.	Further research and investigation required, which includes examining contextual information about the Plan area or topic field.	
Assessment suggests that policy is not being implemented	Review the policy in accordance with that	
Assessment suggests that the strategy is not being implemented	Reviewing the Plan	

2.8 The performance of policies will need to be carefully considered due to the period mentioned for indicators and triggers. Some refer to an annual period while others are relevant to a period of two or three consecutive years, therefore it will not be possible to identify any trends.

### Key Findings

- Policy PS1: Welsh Language and Culture was used in an planning appeal soon after the adoption of the JLDP to dismiss an appeal for 366 houses in Bangor as the Planning Inspector did not consider that sufficient evidence was provided to prove that there would not be a negative impact on the Welsh Language.

- The 2019 and 2018 Joint Housing Land Supply (JHLAS) Studies indicate that 1,010 homes were completed during the monitoring period (462 units in 2017-18 and 548 units in 2018-19)<sup>1</sup>
- The 2019 JHLAS outlines that the Councils have a housing land supply of 5.3 years which is above the 5 years as required by Technical Advice Note 1
- 55% of the housing units<sup>2</sup> permitted during the AMR period are within the Sub-regional Centre and Urban Service Centres. 23% of units have been permitted within the Local Service Centres with a further 22% permitted in Villages, Clusters and Open Countryside.
- In the AMR period (2017-19), 34.4% of housing units completed in the Joint Local Development Plan area are located on sites allocated for housing.
- Average density of new housing permissions in Plan area during the AMR period is 29.3 units per hectare.
- 254 affordable housing units completed in 2017-19. Significant increase in the number of affordable housing units completed in 2018/19 (193 units) compared to previous years. Note these figures do not include housing that is affordable due to its location, and size as the case may be in certain areas within the Plan area.
- 6 affordable housing exception sites permitted during the AMR period.
- 2 local market units given planning permission during AMR period. No local market units completed.
- Since adoption the Councils have adopted 3 Supplementary Planning Guidance and another 5 are close to adoption or underway
- The Councils received 71 Appeals during the Monitoring Period. 71.5% of these were dismissed.
- In June 2018, Horizon submitted a Development Consent Order application in order to develop a new nuclear power plant, and a public inquiry was held.
- Hitachi announced its intention to delay the proposal of developing the new Nuclear Power Station; however, Horizon confirmed that it would continue to allocate resources to ensure that the process of examining the application is completed, and a decision is expected at the end of October 2019.
- Planning Permissions have been granted for renewable schemes that have the potential to contribute a total of 54Mw within the JLDP area.
- On the whole, the indicators suggest that the Plan is performing in accordance with expectations and at this early stage no policies have been identified as failing to deliver the objectives of the Plan.

This first Annual Monitoring Report outlines that the policies of the LDP are being implemented and the strategic objectives are being achieved. The AMR does not raise any concerns about how the plan is being implemented. It is important to note, this is the first AMR of the JLDP, so it is not possible to identify any trends. The findings in the coming years will be important for this and therefore any conclusions are preliminary at this early stage of monitoring of the plan. This AMR will provide a baseline for future comparative analysis, showing evidence of emerging trends.

## Sustainability Appraisal

As part of the Local Development plan process Councils were required to undertake

---

<sup>1</sup> As the data is collected annually the figure for the period of 2017-2018 is for 1<sup>st</sup> April to 31<sup>st</sup> March therefore the total figure covers the period 1<sup>st</sup> April 2017 – 31<sup>st</sup> March 2019 which is more than the period of this AMR.

<sup>2</sup> New housing permissions or permissions to re-assess and to extend expiry date of prior permissions

Strategic Environmental Assessment of the JLDP. In order to ensure that the condition of the environment is monitored continuously throughout the period of the Joint Local Development Plan a monitoring framework has been produced which includes 11 objectives (below) which are broken down into 29 indicators. An analysis with any actions required will be included in the AMR.

Table Sustainable Appraisal Monitoring - Summary		
Objectives		Result
1	Maintain and enhance biodiversity interests and connectivity	✓
2	Promote community viability, cohesion, health and well being	0
3	Manage and reduce the impacts of climate change by promoting and supporting mitigation and adaptation measures	+/-
4	Conserve, promote and enhance the Welsh language	✓
5	Conserve, promote and enhance cultural resources and historic heritage assets	✓
6	Support economic growth and facilitate a vibrant, diversified economy providing local employment opportunities	+/-
7	Provide good quality housing, including affordable housing that meets local needs	✓
8	Value, conserve and enhance the plan area's rural landscapes and urban townscapes	✓
9	Use land and mineral assets efficiently and promote mechanisms for waste minimisation, re-use and recycling	✓
10	Promote and enhance good transport links to support the community and the economy	+/-
11	Safeguard water quality, manage water resources sustainability and minimise flood risk	+/-

### Reviewing the Plan

- 2.9 After preparing a series of Annual Monitoring Reports, that show whether the Plan achieves its objectives or not, or four years after adopting the Plan, Councils must consider how they will review the Plan, in order to prepare an alternative plan. The Reviewing Report should be submitted to Welsh Government within six months of the reviewing process stating whether or not the review is a full one, i.e. a new plan, or a brief review process.

- 2.10 In terms of the Joint Local Development Plan, both Councils must comply with the monitoring and review process. Both Councils must review the Plan; it cannot be done on a one-sided basis by an individual Council.
- 2.11 When a decision is made on what type of review is necessary, **steps set out in the Regulations will need to be followed, which include preparing a draft, a public consultation and a public examination before the new plan or amended plan can be adopted.**

### 3. Timetable and Next Steps

- 3.1 As has been outlined already the Annual Monitoring Report has to be submitted to the Welsh Government by 31<sup>st</sup> October 2019. The monitoring report will be presented to members in the committees and meetings below before being sent to the Welsh Government.

Meeting	Date
Gwynedd Cabinet Meeting	15/10/19
Scrutiny Committee Ynys Mon	24/10/19
The Executive Ynys Mon	28/10/19
Send Copy to Welsh Government	By 31/10/19

### 4. Recommendation

- 4.1 The Joint Planning Policy Committee is asked to accept the Annual Monitoring Report (Appendix 1) and offer advice on it before it is presented to the Cabinet (Gwynedd Council) and the Executive (Ynys Môn)

### Appendix 1: Annual Monitoring Report August 2017 –March 2019.
